

ABSTRACT OF THE DISCLOSURE

A sheet feeding apparatus main body for  
containing sheets in the inside thereof includes: a  
first cover and a second cover which are openable and  
5 closable; and a detecting sensor for detecting an  
opening and closing of the first cover. The  
detecting sensor does not detect closing of the first  
cover when the first cover is closed in a state in  
which the second cover is opened and detects closing  
10 of the first cover when the first cover is closed in  
a state in which the second cover is closed.
